| The wharf has been closed to vehicle traffic for some time, and a recent inspection has confirmed that the wharf is no longer fit for use. To limit the risk to the public and the Town's liability, it is recommended that this unusable wharf be removed. |                    |                |            | Griffith Wharf is a small wharf located in Tsehum Harbour, at the end of Griffith Road.<br>Although the Town has been maintaining it over the years, we do not hold a water lot lease<br>for the structure. It is unclear who originally installed the wharf, but the Town, in<br>cooperation with the Federal Government, replaced it in the 1980's. |                       |                |            |  |

|--|---------------|------------------|------------|---|--------|----------|----------------|----------------|-----------------|
| Hedge along the Waterfront Walkway is reaching its end of life and outgrowing its available space. |               |                  |            | Hedge replacement is required to continue to provide a wide walking corridor and allow the lights to shine on the pathway. Hedge maintenance is required in the early stages of the hedge's life to ensure that it is maintained at a smaller size. |        |          |                |                |                 |

| Pathways are currently gravel. When the park was built, the intent was to pave these pathways as budget allows. This will decrease ongoing maintenance through the park. |         |         |                | Paving area is approximately 850m2, with a 2m wide pathway. We will also need to slightly widen the gravel base to ensure path's long-term integrity. |                         |          |                |               |                 |

| To install solar panels and a bi-directional meter at the Sidney<br>Food Bank building. This item has been reviewed with a climate<br>lens and we have confirmed that there is benefit in installing solar<br>panels on this building to reduce emissions. |         |         | This green project will reduce the Town's energy consumption. The Food Bank is a good location because the wiring is quite recent (which makes installation less expensive) and the metal-panel roof makes the installation simpler. |            |                       |        |                |                |                 |

| To improve curb returns and let downs to improve accessibility on<br>Beacon Avenue. Staff will continue this program until all of the curb<br>returns on Beacon Ave are improved. This level of funding is<br>sufficient to complete approximately two per year. |         |         |                | Some of Sidney's curb ramps, specifically along Beacon, are uneven and are not laid out to allow people with visually impairments to know they are approaching an intersection. Replacements will start at know problem intersections that are not expected to be developed soon. It's expected that grade and electrical improvements will be required. |                     |          |                 |                |                |                 |

|--|----------------|----------------|------------|--|----------|---------------|------------------|---------------------------------------|-----------------|--|
| Program to replace Town owned HPS lighting in residential areas<br>with efficient LED lighting. This replacement will lead to long-term<br>cost savings. |                |                |            | As a result of the BC Hydro LED replacement program, the cul-de-sac lights in Sidney's neighbourhoods require replacement. Unfortunately, due to the scope of this Province-wid program, BC Hydro does not offer shielding solutions to unique situations such as Sidney cul-de-sacs. This budget will allow the Town to procure and install new LED lights and arms with adequate shielding to limit light spill into residential properties. |          |               |                  |                                       |                 |  |

|---|--------------------------|--------------------------|------------|-------------------------------|--|--------------|--------------------------|----------------|---------------------------------------|--|
| The Active Transportation Plan recommends several small<br>improvements to Sidney's pedestrian and cycling networks. This<br>budget will allow staff to chip away at these improvements each<br>year. These improvements may include, but are not limited, to:<br>- Pedestrian or Cyclist Activated Crossings;<br>- Traffic light modifications (signal timing);<br>- 'quick build' pedestrian and cycling improvements;<br>- Bike parking. |                          |                          |            | for pedestrian received reque | As Sidney densifies and moves towards higher volumes of active transportation, the for pedestrian and cyclist activated crosswalks is becoming more evident. In 2021, received requests for pedestrian activated crosswalks throughout Sidney. Staff con prioritize these requests. Other priorities come from the Active Transportation Plan. |              |                          |                |                                       |  |

| Replacement of 75m of 150mm water main pipe on Judson Place, from WN331 to WN328. |         |         | This watermain had two breaks during 2023. Staff are concerned that other service connections along this watermain were installed in the same time period and therefore expect more will fail in the near future. This watermain replacement has therefore been brought forward to limit future risk. |            |                      |          |                           |                |                 |
